Seminar Content and Objectives

Our 2013 Spring Educational Event will feature various laboratory topics. The morning session includes information regarding Sepsis, Point of Care Testing and a very informative Legislative update from Senator Tim Johnson's office. Lunch will be provided. The afternoon features the topic of thrombosis and a very interesting interactive presentation by Ross Miller M.D. followed by the CLMA Siouxland Chapter Meeting (for members and those interested in attending). Various vendors will be available during lunch with laboratory information.

After the seminar, the attendee will:

- Have a better understanding of sepsis screening, diagnosis, risk stratification and monitoring.
- Have a greater knowledge of Point of Care Testing.
- Receive an update from Senator Tim Johnson's office regarding the many legislative issues impacting healthcare.
- Have access to various vendors for questions and answers regarding various instruments and products.
- Understand the reasons for thrombosis and laboratory testing for thrombophilia.
- Will have a better understanding of the impact of laboratory testing as we follow a patient throughout his life and look at various clinical and laboratory correlations.
